

CONSTRUCTION NOTICE

NORTH MILL CREEK

Project overview

EPCOR is preparing to build a new overflow tunnel along the alignment of 88 Avenue, west of Mill Creek. The work will involve constructing a 12 meter long (900 mm diameter, approximately 10 meters deep) tunnel, and an additional shaft (3 m wide) on the west side of the bicycle trail.

Construction

Heavy equipment and trucks will be used during the construction process, which may result in some minor vibrations and noise near the work areas.

Schedule

Construction is scheduled to begin the week of **November 13** and is expected to be completed by **April 2018**, weather permitting.

Typical hours of operation will be from 7:00 a.m. to 7:00 p.m., Monday to Saturday. If required, these hours may be extended, and construction may occur on Sundays from 9:00 a.m. to 5:00 p.m.

Traffic accommodation

Temporary trail closures may be required to facilitate construction activities. Signage will be posted advising pedestrians of any trail detours or route changes. Please see map on reverse side of this notice for details on detours. We will make every effort to keep traffic disruptions to a minimum.

To help enable the construction to take place safely and efficiently, there will be NO CYCLING on the trails as the work progresses through the area.

Safety

The construction areas will be fenced and/or marked as restricted areas. We will take every precaution to ensure public safety, and we also need your assistance in keeping children and pets a safe distance from the construction site and the equipment.

We thank you for your patience and understanding as we continue this necessary work.
